

Cases, crates, pallets, glass carrying and packaging products

With 100 years of experience its no wonder our case makers are in such demand. Whether its in timber or plywood, built to British Standards, HT56/30 (Heat Treated Timber - ISPN 15 Compliant (for exporting outside of Europe)), we have the knowledge and understanding of how best to pack your products utilising the most appropriate design. For airfreight ask about our plywood and OS boards - the lighter alternative to timber.

C JACKSON
& SONS LTD.

Whether you are working to a budget
or a particular build quality,
our case makers will construct you
the best solution -
from economical
to the 'Rolls Royce' of cases.
